CATTLE—As usual very large cattle were hard to sell and the demand was chiefly for good to choice steers of medium weight. There was no improvement in butchers' stuff and cows were slow at week prices, with sales at 2008-15, chiefly at 1208-15. As it was "calf day," there was a good supply, but the demand was so lively that although about 2,000 were on sale, prices shot upwerd fully 25c per 100 pounds, and sales were largely at 5.00 fis. 3. The stocker and feeder branch of the market was not characterized by much life, and prices were weaker as a rule. Cattle were rather slow at easier prices at 2,506,50. Hogs were offered on the market today, including 5,000 left over from yesterday. The reduction in supply in connection with an active demand from Chicago nackers and easiers give remained from Chicago nackers and easiers give sentiers an opportunity to dictate terms, and prices advanced 5,000 per 100 pounds, the best droves fetching 5.5. Heavy hogs sold at 4,256,45, chiefly 24,456,55, and light mixed weights at 4,356,40. The demand was sufficiently large to absorb the supply and the closing was firm.

SHEEP—Receipts, 5,000 head. Prices ruled steady at yesterday's decline.

came near being a victim of the terrible flood that visited that section last Thursday. He was caught in the rushing waters and lost all of his baggage. He states that he helped to bury four persons who met their deaths by drowning near Ozona. Two others belonging to the same family were drowned, but their bodles have not been recovered.

ONE GOOD RESULT.

San Francisco, May 25.-As a result of the woman's congress which was held last week, an organization to be known as the California Suffrage constitutional amendment association was formed to-day. Mrs. Sarah B. Cooper was elected president. The object of the association is to secure an amendment to the constitution of the state permitting women to vote.

SWEDEN AND NORWAY. London, May 28.—A dispatch to the Times from Berlin says the Frankfurter Zeitung reports that there is great anxiety in government circles in Sweden regarding the threatened armed conflict which may end in the dissolution of the union between Sweden and Norway.

TO LIVE A LITTLE LONGER.

San Francisco, May 28.—United States darshal Baldwin received a dispatch

SUGAR FACTORY GOING.

Commenced Operations on Low Product Held in Stock.

HALF A MILLION POUNDS.

MOUNT OF SUGAR WHICH WILL BE PRODUCED.

Sugar company in operation, this time for the manufacture of the raw product, or molasses, held at the works since the close of the season's regular run, into sugar. The latter is to be raw, however, the refining being left until the commencement of operations in the fall. This will give the refinery some work to do while the beets are being prepared for the crushers and the first raw sugar is

being manufactured. Work was resumed yesterday morning and when he came to the city last evening, General Manager Cutler of the company, stated that the machinery was running smoothly and the raw sugar would soon commence to come sugar would soon commence to come out. He is of the opinion that the run will last in the neighborhood of twenty days, not more, and during that time he expects to turn out about half a million pounds of the raw product. Of course, only part of the works is being operated but the company is giving employment to some thirty hands in and around the plant and the distribution of the wages at the end of the run will prove very gratifying to the people who were for-

plant and the distribution of the wages at the end of the run will prove very gratifying to the people who were fortunate enough to secure places.

Contrary to general expectations, nothing has been heard from the secretary of the treasury relative to the bounty payments provided for by the Congress of the United States at the last session, and in the opinion of Mr. Cutler nothing will now be heard until after the end of the fiscal year, June 30, by which time all of the production reports are expected to be in and before the secretary and his assistants. Until such time it will be impossible for any classification and subsequent distribution of the bounty money to be made. Congress only made an appropriation of five million dollars for the payment of all of the sugar claims and it is highly probable that none of the producers will be enabled to secure their full shares, but will be forced to be satisfied with the pro rats distribution always resorted to when the funds on hand will not permit of a full payment. The share of the Utah Sugar company should be in the neighborhood of \$40,000, but it is doubtful whether or not the company will receive any such sum.

Mr. Cutler reports that the beet CAPTURED THE ROBERS.

Annual Times Was a New Hands.

Annual Ti

directors, to be held within a few days. The board has just held a meeting, at which it considered many of the details connected with the inauguration of such an enterprise, and the decision was reached that when once commenced the work should be pushed to immediate completion. There are several very important matters which require very careful attention before the installation of the plant is commenced.

Installation of the plant is commenced.

As is very generally known, The Utah company was organized for the purpose of taking the waters of Big Cottonwood at a point some little distance below the site of the proposed works of the Big Cottonwood Power company and throwing it into a pipe line of about three miles in length, through which it is to be delivered at the power wheels in the works to be located at the mouth of the campon. Since the organization of the company several of the officers have gone up over the proposed pipe line and made inspections of the sites selected for the works, and President Armstrong, in commany with Superintendent Arnold and an engineer, devoted the greater part of a day to an inspection of the work already done and that laid out. A small force of workmen is now in the employ of the company and engaged in opening up the trench for the pipe line. Just as soon as the details are settled upon this force is to be greatly increased and an effort will be made to have the plant in and the power ready for delivery early in the fall.

Fair progress is being made on the reservoir and outlets of the Big Cottonwood Power company, above The Stairs. A considerable force has been steadily employed by the company and the energies of the men are now directed to the placing of the gates recently sent out, which are to set in the mouth of the outlet, or drain tunnel. With these shut-offs in place the company will be enabled to fill its reservoir before the irragation season. As is very generally known, The

sets in. Three of the officials of the company, Messrs. Donnellan, Cannon and Jones, have gone east for the purpose of attending to some financial details for the company and it is also likely that they will spend some time in an inspection of the class of machinery which is to be used in the plant of the company. It is stated that the outlook for the successful placing of the bonds to be issued by the company is extremely favorable.

IDANHA WILL REBUILD.

Bottling Works Recently Destroyed to Be Replaced.

Advices received from the north yes terday were to the effect that the board of directors of the Idanha Minboard of directors of the Idanha Minteral Power Company Preparing to Make Some Active Moves—Fair Progress Being Made at the Reservoir of the Hig Cottonwood Power Company—Idanha Bottling Works Are to Be Replaced at Once—New Gas Well Going Down Rapidly.

Again is the factory of the Utah again is the factory of the Utah again company in operation, this time or the manufacture of the raw product, or molasses, held at the works

GAS WELL GOING DOWN

American Company Will Do More

General Development Work. Secretary Driver, of Up American Natural Gas company, reports that the newest well being put down by the company has reached a depth of over 490 feet and is going down toward the gas reservoir below, in splendid shape, He says the company is prepared to put down in the neighborhood of a dozen more wells and work on them is to commence just as soon as the one now being driven is completed. At the present rate is should not be many natural gas is added to those now passing into the system of the Salt Lake and Ogden Gas and Electric Light company for distribution among the consumers of gas in this city. It is the intention of the company to thoroughly develop the Lake Shore deleds and the work has hardly commenced. It has progressed far enough, however, to demonstrate beyond the question of a doubt the permanency of the gas supply at the Shore, and this is what the company has been working for since its incorporation.

Preparations are being made to turn in soord new districts of the local control in soord new districts o Secretary Driver, of the American Natural Gas company, reports that the newest well being put down by the

par. One of the most traded in is Z. C. M. I., which is now above the \$100 mark, or par. Another is the First National of Ogden, a small block of which yesterday changed hands at \$150.

Going to Canada.

Messrs William McIntyre and James Cunningham, left for the north last evening and it is likely that neither will return to this gity before in the neighborhood of three weeks. The gentlemen are bound for the Canadian colony of Alberta, where they may secure ranches upon which to range cattle. Both of them have before visited the colony but that was during the winter months and then they did not have a good opportunity of viewing the lands. Advices received from the north are to the effect that the snow is all gone long ere this and the country is in splendid condition.

Soon as he gets here he will appear and fix things up.

In the matter of the estate and guardianship of William L. Price, Hiram Yeager appeared yesterday and exhibited a receipt from his ward and establed up all matters pertaining to the estate. The ward in this case attained his majority years ago and the papers have been on file ever since. Nothing was done in the case and it, with many others of a like character, have dragged along until notice was sent out that something must be done. The guardian was discharged.

Distribution was asked for by the commissioners in partition of the estate of Levi Reed. This matter has been pending for a long time, too. The property was quite valuable, and on the showing made will be divided as follows: To Augusta Reed, real estate and presonal property to the value of \$3.092.43. The balance is divided between the remaining heirs in the sum of \$442.77 each. There are fourteen of the matter of the long tank in things up.
